EDUCATION

Chandigarh University Mohali
BE CSE with specialization in Internet of Things; CGPA: 8.18/10 *August 2021 - June 2025*

St. Anselms sr. sec. school Alwar
Computer Science; Central Board of Secondary Education); 91% *April 2020 - April 2021*

EXPERIENCE

Wictronix Mohali
Full Stack Developer *Aug 2023 - Oct 2023*

- Developed a comprehensive e-commerce platform to facilitate online shopping and transactions. Implemented authentication mechanisms to ensure secure user access, enhancing platform security and user trust.
- During my internship as a Full Stack Developer specializing in the MERN stack, I worked on developing a comprehensive e-commerce platform. I was responsible for designing and implementing both the front-end and back-end components, ensuring seamless integration and user experience.

PROGRAMMING SKILLS

- **Languages**: C++ , Python, Javascript, HTML, CSS,Java
- **Databases**: SQL, MongoDB
- **Technologies and Frameworks**: ReactJs, Next.js, NodeJs , ExpressJs, TailwindCSS
- **Core Subjects**: Advanced Data Structures, Object Oriented Programming, Operating System, Database Management System, Computer Networks

PROJECTS

- **Suppliez (A Grocery Store)**
  - **MERN:** based grocery store , Suppliez, a student-focused grocery store featuring an intuitive user interface and an efficient admin dashboard for seamless order management.
  - My expertise in full-stack development enabled me to create a dynamic platform tailored to the unique needs of university communities.
- **InnovateOpen (Open Science Contributions platform)**
  - Pioneered the development of an innovative open science contribution platform, fostering collaboration and knowledge sharing within diverse scientific communities.
  - Utilized advanced technologies to create an inclusive digital space, facilitating seamless interaction and impactful research dissemination.
- **JNTalks (Zoom Clone)**
  - JNTalks is a robust Zoom clone developed using Stream.io and Next.js. This platform offers seamless video conferencing capabilities, real-time chat, and collaborative features, providing users with an efficient and reliable virtual meeting experience.
  - Leveraging the power of Stream.io for scalable messaging and Next.js for a dynamic front-end, JNTalks ensures high performance and a user-friendly interface for all your communication needs.
- **Portfolio Website**
  - Built a personalized portfolio website primarily using React.js, featuring a sleek and modern design to showcase my projects and expertise effectively.

ACCOMPLISHMENTS

- **Qualified in NASA space Hackathon at zonal level.**
- **Participated in Smart India Hackathon.**

COURSES

- **An Introduction to Programming in C++** (NPTEL)
- **Introduction to Data Science Specialization** (LinkedIn)
